

# SOBUJ MIAH

## Office Administration · Operations Support · Independent Software & AI Systems Engineer

Savar, Dhaka, Bangladesh · GMT+6 (flexible hours) · soobujmiah@gmail.com  
linkedin.com/in/soobujmiah · t.me/soobujmiah · github.com/soobujmiah · soobujmiah.github.io

### PROFESSIONAL SUMMARY

---

Detail-oriented operations professional with 8+ years across administration, operations and technical support in Bangladesh and Saudi Arabia — from Saudi Aramco gas-plant project sites to running the daily back office of an education organisation in Dhaka. Alongside this, a self-taught systems builder: Linux on Android, Termux/PRoot workflows, local AI runtimes and technical documentation. Working principle: document everything, verify before reporting, own the outcome. Open to freelance and remote work.

### WORK EXPERIENCE

---

#### Independent Software Builder

Apr 2026 – Present

*Self-Employed*

- Build and maintain independent, open-source software across Android, Linux/ARM, and on-device AI — including local LLM inference, native ARM64 toolchains, and offline-first tooling.
- Design, test, and document developer tooling and real-device experimentation workflows entirely from an Android phone.

#### Office Admin

Mar 20, 2025 – Present

*Rabeya Education Family · Savar, Dhaka*

- Oversee daily operations as administrator across the organisation.
- Manage students' online registration, data records, documents and filing system.
- Manage social media pages and groups; handle website SEO and content updates.
- Create promotional media — graphics and video.
- Built an internal document-automation engine (certificates, testimonials, routine paperwork) to speed up record processing — private tooling, not published, built for internal institutional use.

#### Unemployed

May 2022 – Mar 2025

—

- No formal employment during this period.

#### Coordinator

Sep 2020 – May 2022

*Abdullah Trading Pvt Ltd · Jubail, Saudi Arabia*

- Coordinated site operations, logistics and team communication.

#### Electrician

Jun 2020 – Aug 2020

*Shapoorji Pallonji Engineering & Construction (SPEC) · Saudi Arabia*

- Performed electrical installation and maintenance in industrial and residential settings.

#### Electrician

Oct 2019 – Jun 2020

*Sky Packing Material Trd: LLC · Saudi Arabia*

- Performed electrical installation and maintenance in industrial and residential settings.

#### Electrician

Apr 2019 – Oct 2019

*Khaled Juffali Company · Saudi Arabia*

- Performed electrical installation and maintenance in industrial and residential settings.

#### Electrician

May 2018 – Feb 2019

*Saudi Electricity Company · Saudi Arabia*

- Performed electrical installation and maintenance in industrial and residential settings.

#### Progress Reporter

Dec 2017 – May 2018

*Petroleum, Chemical & Mining Company (PCMC) · Al-Jubail, Saudi Arabia*

- Collected daily project progress data directly from site.
- Digitised and systematised field information into structured records.
- Submitted validated reports to project management authority.

### Firewatcher

Apr 2017 – Dec 2017

Saudi Aramco Fadhilli Gas Project · Saudi Arabia

- Ensured work sites remained free of fire hazards.
- Monitored super-hot environments and equipment for fire risk.

### Web Designer, Graphics Designer, Email Marketer

Feb 2015 – Feb 2017

Fiverr · Independent / Remote

- Delivered web design, graphics design, and email marketing projects for clients via Fiverr.

## SELECTED TECHNICAL WORK

**Termux AI Workstation (flagship).** Complete Linux desktop and private AI inference lab built and documented entirely on an Android phone — no PC, no root. PRoot Debian/Xfce over Termux-X11 with D-Bus and PulseAudio; Mesa Turnip + Zink GPU-accelerated desktop graphics; llama.cpp serving GGUF models locally over HTTP with CPU inference validated on-device (Vulkan/NPU offload under active qualification); AI coding agents integrated for daily development.

### LAI — Bangla-first local AI (Android).

- Device-validated local CPU inference (Qwen 2.5 1.5B via llama.cpp), verified model delivery and offline restore, and consent-gated automation with hash-chained audit.
- Reproduced and investigated a native Vulkan-bound crash on Adreno 825, separated independent configuration and pipeline failures, systematically eliminated tested application-level hypotheses, experimentally falsified an upstream candidate, and isolated the remaining failure to the GPU/driver execution boundary without overstating what could be proven from closed-source components.

**Other public work.** Ternux (Android-to-Linux workstation), GGEN (AI creative & document studio foundation), DataKhoj (cross-platform data collection), DocDr (mobile-first document workspace, early development). Public claim grading: [soobujmiah.github.io/claims.html](https://soobujmiah.github.io/claims.html).

## SKILLS

|                    |                                                                                                                      |
|--------------------|----------------------------------------------------------------------------------------------------------------------|
| Administration     | Office administration, records & filing, data entry, progress reporting, online registration, logistics coordination |
| Digital operations | Social media management, website SEO, content updates, graphics & video, email marketing                             |
| Office tools       | Microsoft Office, Google Workspace, documentation systems                                                            |
| Linux & systems    | Linux administration, Debian, shell scripting, Termux / PRoot / Termux-X11, Xfce, troubleshooting                    |
| AI & development   | llama.cpp, GGUF workflows, local LLM deployment, Git & GitHub CI, Python, Kotlin, technical documentation            |
| Languages          | Bangla (native), English (fluent), Hindi & Urdu (fluent conversational), Arabic (conversational)                     |

## EDUCATION

Self-educated (autodidact) — continuous independent research and practical application. Principle: “Living till learning, dead upon stop learning.”
