LANGUAGES

- Bangla — native
- English — fluent

CORE FOCUS

- On-device LLM inference
- Android systems & automation
- ARM64 Linux from AOSP
- Native tooling & signed releases
- GPU / Vulkan / Turnip / Zink
- Documentation as engineering

SERVICES

- Website development & maintenance
- Custom software & small-business tools
- Digital workflow automation
- IT & computer support (Windows/Linux)
- Android & phone software support
- Office administration & records

PROFILE

Self-taught systems engineer working at the intersection of on-device AI, Android systems and ARM64 Linux. I develop, build and validate software primarily from an Android phone running Termux and PRoot Debian — every build runs on CI and every claim is checked against real hardware.

ENGINEERING EXPERIENCE — SELECTED WORK

• LAI — on-device AI runtime

Bangla-first local LLM inference and consent-driven Android automation. arm64 llama.cpp CPU inference device-validated at 12–20 tok/s; Adreno Vulkan crash root-caused into a fail-closed CPU-default design.

• ADT — ARM64 Android toolchain

Builds Android SDK build-tools and platform-tools from AOSP source for Linux ARM64/glibc; SHA-256-verified offline artifacts; full APK pipeline validated end-to-end on device.

• Ternux — Linux desktop on Android

No-root Debian/Xfce4 desktop over PRoot with a measured Zink/Turnip GPU route (glmark2 140, OpenGL 4.6).

• GGEN — creative & document studio

Flutter/Dart vector, raster, document and PDF foundation; 143 pure-Dart unit tests, 353 widget tests.

• Songjog — Bengali business ledger

Bengali-first operations app (Owner Edition); 94 tests green on CI; export and diagnostics device-validated on Redmi Turbo 4 Pro.

OPERATIONS & ADMINISTRATION

• Independent Systems Builder & Engineer — Pro-Jukti Info Tech (2026–present)

On-device AI, ARM64 Android tooling and Linux systems, delivered independently.

• Office Administrator — Rabeya Education Family, Savar, Dhaka (2025–present)

Daily operations, social media and SEO, student registration, records and promotional media.

EARLIER EXPERIENCE (2015–23)

- | | |
|---------|---|
| 2015–17 | Email marketing — freelance, online |
| 2017–18 | Fire watcher — Aramco site (Fadhli), Saudi Arabia |
| 2018–20 | Progress reporter — PCMC, Saudi Arabia |
| 2020–21 | Electrician — SEC (Khaled Juffali), Jeddah |
| 2021–22 | Coordinator — Abdullah Trading, Jubail |
| 2022–23 | Computer operator — Savar, Bangladesh |

TECHNICAL SKILLS

On-device AI llama.cpp, GGUF, KV-cache, CPU/GPU/NPU routing

Android Kotlin, Compose, Accessibility, Shizuku, JNI/C++

Linux / ARM64 AOSP builds, Clang/CMake/Ninja, Termux + PRoot

Graphics Vulkan, Mesa Turnip, Zink, Adreno KGSL

Mobile & web Flutter, Dart, TypeScript, Python

Engineering ops GitHub Actions CI, signed releases, device validation

EDUCATION & LEARNING

Self-taught through independent research and practical application — continuous study across algorithms, systems, statistics and networking. Working principle: living till learning.
